something to attract and interest you. If you are fond of history, it contains the finest collection of histories in the world, embracing every nation of ancient and modern times, from heavy Egypt, with its civilization running back for thousands upon thousands of years, to the latest born of the great family of nations. And they are not dry as dust histories, either, giving nothing but dates and mere descriptions of svents; but genuine historical works, as interesting as Macaulay's History of England, and some of them from Lord Macaulay's pen. Or if you have a tasta for travels and descriptions of strange countries and their peoples, the AMERICANIZED ENCYCLOPZEDIA BRITANNICA will lead you with the famous voyagers and explorers among the sunny islands of the Southern Seas, through the dreary wastes of Arctic ice, across the pathless wilds of Africa, or among the quaint peoples of the East. It will tell you of the vanished civilization of Pera, of the growth or subsidence of feudalism in Europe, of the social and governmental polity of modern nations. And if, while you are roading, you come scross some reference to a great man with whose deeds you are unfamiliar, the Americanized Encyclopedia Britannica contains a perison library of biographical memoirs, to which you can turn with the certainty of finding just exactly what you want to know.
